

Control Alarm Unit (CAU) Last-Time-Buy Notification

Dear Valued Customer

It is our policy to continuously improve our product offering by looking ahead and providing new solutions for our customers' changing demands. With the transition of networks to IP technology, Aviat Networks has recently introduced its new SONET, SDH and IP-based indoor radios and as a result discontinued the MegaStar 155 in 2009 and discontinued Constellation in 2010 that used the Control Alarm Unit (CAU) to extend alarm monitoring and control. When it is determined that a product must be discontinued, Aviat Networks makes every commercially reasonable effort to:

- Provide 6 months notice so our customers can perform a needs assessment, obtain budget authorization, and place orders for radios and spares before the Last-Time-Buy end date
- Offer new products that are compatible with the products being discontinued to protect your radio network and Element/Network Management investment
- Deliver Repair and Return (R&R) support for 10 years after the Last-Time-Buy date, i.e., up to December 31, 2020
- Make available Synergy Extended Warranty support during the 10 years after Last-Time-Buy date. This service includes Repair and Return (30 day turnaround) as well as Technical Support during normal business hours.

This letter is to inform you that effective July 5, 2010 the Control Alarm Unit (P/N 201-099946-001); "CAU" product will enter a Last-Time-Buy period which ends on December 31, 2010.

Effective December 31, 2010, the product will be reclassified as "Maintenance Only (MO)."

There is no direct functional replacement for the Control Alarm Unit (CAU). Depending on the application, there may be different types of equipment manufactured by outside vendors that will meet the system requirements. Please contact the "Product and Partners" staff for assistance in selecting and quoting alarm and control equipment.

If you desire to purchase Control Alarm Unit (CAU), or require additional information, please contact your Aviat Networks Sales Representative.
